SUMMARY

Software Engineer (B.S., 2024) with frontend experience on a banking product at NTT DATA and 3 self-built full-stack projects live in production, built end-to-end with React, TypeScript, Node.js, and Supabase. Certified B2 English.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React, Next.js, Astro, Vite, Redux, Tailwind CSS, Ionic

Backend & Data: Node.js, Express, PostgreSQL, Supabase, REST APIs

Tools & Practices: Git, GitHub, Jira, Confluence, Figma, Scrum, Responsive Design, Atomic Design, BEM

FEATURED PROJECTS

Personal projects designed and built end-to-end. Code available on GitHub.

Carwash SaaS — Multi-tenant management platform for car wash businesses

Node.js · Express · PostgreSQL · React · TypeScript — Live: lavadero-front.vercel.app

- Designed and built a multi-tenant platform with billing, service management, and customer modules on a custom REST API.
- Migrated the entire codebase (84 files across backend and frontend) from JavaScript to TypeScript in 6 phases with strict feature-parity checks, then resolved post-migration runtime bugs (SQL queries, infinite render loops, missing endpoints).

Herin — Product catalog with admin panel

React 19 · Vite · Tailwind CSS 4 · Supabase — Live: herinoficial.vercel.app

- Built a dynamic catalog with a full-CRUD admin panel, per-product image galleries, and row-level security (RLS): public reads, authenticated writes.

ifanidado — Multilingual educational content site

Astro 5 · Tailwind CSS 4 · MDX — Live: ifanidado.vercel.app

- Shipped a multilingual (ES/EN) static site using Content Collections, with content architecture across 5 technical verticals (React, CSS, Python, Arduino, AI).

PROFESSIONAL EXPERIENCE

Bilingual Computer Science Teacher — Gimnasio Los Arrayanes Bilingüe | Bogotá | May 2023 – Present

- Design and deliver the programming curriculum (Python, web development, AI) for 4 grade levels, communicating technical concepts to non-technical audiences in both Spanish and English.
- Lead the school's robotics club; coached the student team that built a Bluetooth-controlled 4WD robot for an interscholastic competition (2026).
- Ship curriculum, projects, and assessments on fixed per-term deadlines, including assessment strategies adapted to generative AI.

Web & Mobile Development Intern — NTT DATA | Aug 2022 – Feb 2023

- Developed UI for a banking product using React.js and Ionic, applying Atomic Design and BEM.
- Fixed bugs and delivered UI user stories within a Scrum team, managing tasks and documentation in Jira and Confluence.

Mobile Device Homologation Technician — CINTEL | Jul 2021 – Aug 2022

- Led the HETM project (mobile device homologation for Colombia's telecom regulator, CRC), analyzing international databases and regulatory technical documentation.

EDUCATION & CERTIFICATIONS

- **B.S. in Software Engineering** — Universidad Manuela Beltrán (2024)
- **Diploma in Digital Marketing** — Universidad Manuela Beltrán (2024)
- **Intensive React.js Course (71 h)** — Udemy (2025)
- **Microsoft Azure Fundamentals** — Microsoft (2020) · **Scrum Fundamentals** — SCRUMstudy (2020)
- **English: B2 (certified)** · Spanish: Native
